GUIDELINE FOR USING GPS MAP OF: STRENGTHENING THE DAIRY VALUE CHAIN PROJECT

Overview

SDVC is working with farmers to strengthen the Dairy Value Chain (DVC) by improving the efficiency of milk production, reducing milk spoilage, and increasing the profitability of the farmers. The GPS Map is a tool to show the footprints of all the activities on the project, helping to manage and monitor the progress of the project.

HOW TO USE THIS MAP

1. Download the application or website that gives access to the map.
2. Open the application or website in the map view.
3. Select the area of interest to view the map in that area.
4. Use the search function to find specific locations.
5. Use the zoom function to zoom in or out.
6. Use the layers to add additional information to the map.

REQUIREMENTS

- A computer or mobile device with internet access
- A web browser or an application that supports maps
- A GPS device or an app that allows GPS tracking

RESTRICTIONS

- May not be available in some areas
- May not be accessible without internet
- May not work with certain devices
- May not be up to date with recent changes

BENEFIT OF USING GPS MAP IN SDVC PROJECT

- Helping to track the progress of the project
- Improving the efficiency of milk production
- Reducing milk spoilage
- Increasing the profitability of farmers
